

Finelink International Co., Ltd.

Recycling System Identifiable Shuttle Weave- a ribbon of blessing code.

Finelink International Co., Ltd. was established in 2014. Its business focuses on the application design and weaving development of textile products. The manufacturing process is based on adhering to a friendly ecology, friendship and neighborliness. We hope that the innovative products of the finelink R&D laboratory in 2022 can be applied to the supply chain of circular economy resource recovery. In the supply chain of economic resource recycling, we must fulfill our responsibilities as weaving industry.
