

HAE FA TEXTILE INDUSTRIAL CO., LTD.

HAE FA TEXTILE was founded in 1966. Our mission is to always put our customers first. Over time, we develop a wide range of products to support our clients' specifications. Additionally, we have multiple export locations and provide competitive prices.

Despite Taiwan, we have our production line in China and Vietnam as well. We connect upstream and downstream companies in different countries and vertically integrate them to develop a variety of products. With vertical integration, we are agile to respond to changes in the world trade landscape.

We gather fashion trends by observing the market, experimenting with different raw materials, and developing samples. Our client profile range from producing ready-to-wear garments for the everyday person to sport jerseys for sports teams. We have advanced techniques on reactive print and screen design to reach our clients' expectations. Furthermore, we get approved by our customer's colorist annually that allows us to examine the color of the fabric ourselves.

We are committed to a sustainable future. We make every effort to minimize our carbon footprint and to preserve our environment. We updated our GRS and BCI certification every year to maintain our commitment toward the environment.
