

Yao I Fabric Co., Ltd.

Environmental and Functional yarn / fabric

We only have one Earth, so environmental protection is not a slogan. Everyone should make an effort to protect our Earth. Yao I company is proud to present yarns and fabrics with environmental materials at TITAS 2022, which point to end uses such as shoes upper, apparel, suitcase, furniture, houseware, pet products. Let us use the products of eco-friendly materials for a glorious home and earth.

We will present two kinds of environmental yarns: co-extrusion and coated. Using co-extrusion yarns into fabric, the advantage is no additive in any processes, but still can have the combination ability, to implement in an all-round way of environmental protection. And we have unique technology to produce bi-color coated yarn, to make the fabric more gorgeous to attract the consumer.

And we have the functional fabrics by Circular knit, Flat knit, Leno weave, Jacquard, Engineered machines. The pattern design is in line with the mainstream of market, such as light weight, breathable, transparency and shifting effects.

Yao I company' s mission for products is innovation and quality leading, in focus on quality premise to innovation continually. And using environmental element into life necessities to reach comfortable concept and make our life better.
