

## SHING LING

All Made in Taiwan

Established in 1989, Shing Ling Sewing Machine is one of the most manufacturers in Taiwan, producing a full range of high quality industrial sewing machines under "SHING LING" and "Accor" brands.

Their mainly in-housed made sewing machines are FG-666 series flat-bed 3-needle 5-thread interlock machines, FW-777, SL-2700, SL-2800 series feed-up-the-arm 3-needle 5-thread interlock machines, VG-898, VG-999 high-speed cylinder-bed 3-needle 5-thread interlock machines, newly-developed SL-800 series 4-needle 6-thread feed-off-the-arm flatseaming machines with built-out looper take-up device, fully-sealed front cover to block oil splashes, dual differential feed ratio regulators best suited for various kinds of knitting fabrics, SL-1790 S (L) computerized button holing machine.

All of their machines have been certified with ISO9001, 2015 Rev, and Europe CE recognitions and received national Taiwan Excellence Award in 2012 as well as national and overseas patents.

This company observes No-Quality-No-Sales principle and Permanent-After-Sales Service commitment. Prospecting to the trend of automation and labor cost saving for end users' garment production, they will focus on developing automatic sewing machines and equipment and fully support their customers both in hardware and software and jointly establish their cutting-edge factories which will boast of high quality productivity and environmentally-friendliness, all of their efforts will help their customers survive the current competition and grow further.
