## SUNNY SPECIAL

### All-Round Protection Provides the Best Solution

People who live in 21<sup>st</sup> century have to conquer plenty of threats from our surroundings, such as rain, wind, and UV. Functional clothing are no longer specialized for outdoor, our daily life need more technological finishing coping with any emergencies.

"Reliable, durable and comfortable protection" is the topic of Sunny Special for TITAS 2019. They can provide the best solution to customers based on their requirements whether it's for weather protection or professional protection. Sustainability has always been an important part of the company. Since 2011, they have already saved 2 billion bottles water, which can fill in 106 swimming pools. 5,796 MWh of electricity, which can provide a family with 1,150 years of electricity. 63,286 tons of CO<sub>2</sub> emission, which can travel 340 trips to the moon.

The latest progress is their water reclamation system which can purify wastewater to continuously use in all of their manufacturing process. Sunny Special has devoted a massive amount of resources in innovative technology to ensure their consumers get the best products.
