

## CHING CHI MACHINE CO., LTD

Ching Chi Company designs and manufactures high performance sewing machines and deliver products globally by the brand "Kingtex". The automatic sewing equipment "special for knits and sportswear" is exhibited, including round neck UHU9304/SS038, bottom hemming CXM2311/EG070, flat bottom and cuff hemming FTU7011/EG030, and overlock back-latch UHD9024F/BL324. For garment industry, sewing automation helps to save labor cost and improve efficiency.

In the sewing of functional sportswear, the application of 4-needle 6-thread flat seaming has become a big trend. Kingtex has been recognized by customers for its stable quality and performance over the years. This time, the brand new NTD77 series is exhibited. The mechanism is upgraded for the oil-proof improvement by the closed presser foot bar design, and the sensor-type automatic trimmer is optional for thread chain/tape cutting.

Kingtex is very focused on the field of high-end interlock sewing machine and is famous for the models with fabric edge trimmer. This time, it also exhibits the CTD9811 series, small cylinder bed interlock machine with left edge trimmer.
