

Yu Shin Development Co., Ltd.

YU SHIN DEVELOPMENT CO., LTD has been running a business in the textile accessories industry for over 50 years. We specialize in jacquard tape, elastic webbing, woven labels, and badges which can be used on garments, shoes, snow goggles, bags, and all kinds of accessories.

At TITAS 2022 we are excited to showcase the following products:

- 1. Recycled material:** Threats of extreme weather are getting increasingly worse; the hottest temperature will be recorded around the world in 2022. So cutting plastic products and reducing carbon emissions is becoming a major topic for all brands and consumers. We have successfully applied recycled PET-bottle yarns and recycled nylon yarns to all our product range and are able to supply products made of a maximum of 100% recycled yarn.
- 2. Biodegradable products:** It takes dozens and hundreds of years for polyester yarns to be fully degraded. The biodegradable yarns we use can be degraded in a couple of years under certain environmental conditions.
- 3. Innovations:** with 50 years of jacquard expertise, by combining a wide variety of textiles with the latest trends and elements, we proudly bring our new collection of 2024 to you.
