

## Double Bond Chemical Ind. Co., Ltd.

### Total Solution to Inkjet Printing

Double Bond Chemical, founded in 1994, is a global leading manufacturer of specialty chemicals. Utilizing the technology of polymer additives, UV curable materials and inkjet printing inks, DBC is establishing a global inkjet printing center for a total solution featuring eco-friendly properties and diverse applications. Applicable materials include textile fabrics, wallpaper, plastic films, computer keyboards, glass, wood, latex gloves, natural and synthetic leather. Our goal is to make good use of green technology and to achieve enterprise sustainability.

#### Highlight of 2022 TITAS Show:

- Water-based inkjet printing inks: acid, reactive, direct disperse, sublimation disperse, pigment inks
- UV curable inkjet printing inks: rigid, flexible, extremely flexible inks
- Concentrated millbase in nanometer scale: water-based and UV types
- Water-based light fastness enhancers and adhesives
- Applications of inkjet printing on a variety of materials
